## CPP Plastic Pallets

### Export pallets

Our Send & Forget™ export pallets enable us to offer a solution to export-oriented companies which is both economically efficient and environmentally friendly. Increasingly integrated international commodity flows call for plastic pallets which provide a high added value to customers while meeting high environmental standards more than ever before. Our export pallets are made using a specific

recycled ACM material. They are characterized by their lightweight design and by their particularly advantageous price. Obviously, nobody would want to invest a high amount of money in load carriers especially when exporting goods.

### Logistic pallets

Our logistic pallets are sturdy long-life storage aids which have stood the test in high-bay warehouses, automated conveying

and storage systems and in the entire field of distribution logistics. Achieving a high number of cycles is the key to cost efficiency in this area.

Depending on the needs of every application, our pallets are manufactured using either type-specific PE recycled material or virgin material. In most cases, our recycled plastic material will provide an alternative which is both economically efficient and environmentally sound.
